if - Statement

In a program some time we reach across a condition where we have to make decision. Eg. if the car price is less than Rs 200000 then i will buy else i will buy a 2 wheeler.

So in this we have to take decision on the basis of if & else condition.

Syntax

***
```
if ( Condition check)
{  Statement 1;
    Statement 2;
}
```
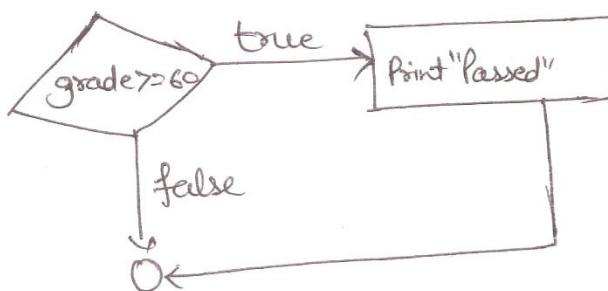

If the condition is true or ok then compiler will enter in if block { } and execute it else it will execute rest of the program.

eg:-
```
if ( grade >= 60)
{  printf ("Passed");
}
```

In this value of grade is checked if it is greater or equal to 60 then if block will be executed
