Requirements Engineering

Requirement Engineering refers to the process of defining, documenting and maintaining Requirements.

OR

Requirement Engineering is the disciplined application of proven principles, methods, tools, and notations to describe a proposed system's intended behavior and its associated constraints.

OR

Requirement Engineering is the process of finding out, analyzing and documenting and checking the behaviour/services and constraints.

OR

Requirement Engineering is the process of understanding and defining what services are required from the system and identifying the constraints on the system's operation and development.
